

Lake Okeechobee Watershed Project Configuration Summary Sheet

Configuration Name: Establish a Unique and Descriptive Name of the Proposed Configuration.

OPTIMIST CLUB

~~Optimist Club~~

Author(s) of the Configuration: Identify the name of the Authors that developed the Configuration during the exercise.

Gary Ritter

Bill

Lisa Kreiger

Camille Avcrofto (Gunter)

(SFWRM)

Tyler Beck

Steve Schubert

Paul Gray

Configuration's General Description: This description should be able to convey the general aspects, elements, and general location of management measures in this configuration.

How will this relate
to BMAP? what is
the coordination?

Management Measures: List the management measures used in the configuration (Reservoirs, ASR, Wetland/Floodplain Restoration).

TC/NS Basin = Added ASR + wetlands on Brady Ranch
 = shallow Reservoir (FEB) on Grassy Island Ranch
 = Urban Stormwater Redirection to GI Ranch
 = Deep well Injection also.

Indian Prairie = Paradise Run + other nearby parcels, but
 interconnected wetlands and shallow (<4') storage
 = may also include public-private
 permanent easements to increase
 functionality.
 = ASR with Paradise Run wetlands

How Water Flows Through the Configuration: This description should identify the travel route of the water that the configuration will be managing. Identify where the water is coming from and where it goes. Generally describe how the water gets from the originating water source (for example, which existing canals/tributaries are used or if new conveyance features are needed) to the final destination of the water.

Basin flows generally stay within each Basin (i.e. TC/NS, IP, etc). However, we rerouted storm water in TC/NS and placed a reservoir in IP basin but would be fed by Kiss R + IP Basin flows

Objectives: Identify and prioritize (rank) the specific LOWP Objectives that the configuration is intended to meet (use the list of Objectives as needed).

3. - highest
2.
1. - lowest

Anticipated Benefits General Description: Identify why the Author(s) chose the features in the configuration. List, prioritize and provide a general description of any benefits anticipated from the Proposed Configuration.

Based on $36 + 16 + 15 + 20 + 25$ years of experience w/ this basin (112 years!!)

Operating Assumptions General Description: List anything specifically that the Author(s) want relative to the operation of the configuration.

Other Key Elements: List the main Considerations that have not been mentioned elsewhere on this form. Examples may include potential Recreational Opportunities or Concerns.
